

HOW MUCH WATER DOES YOUR SEED NEED?

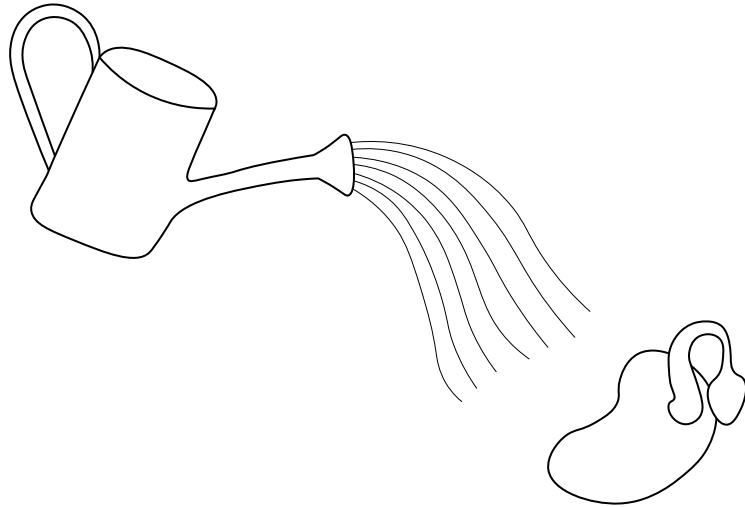

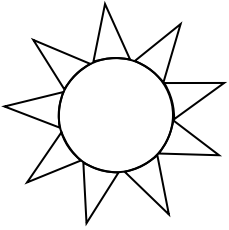

Name: _____

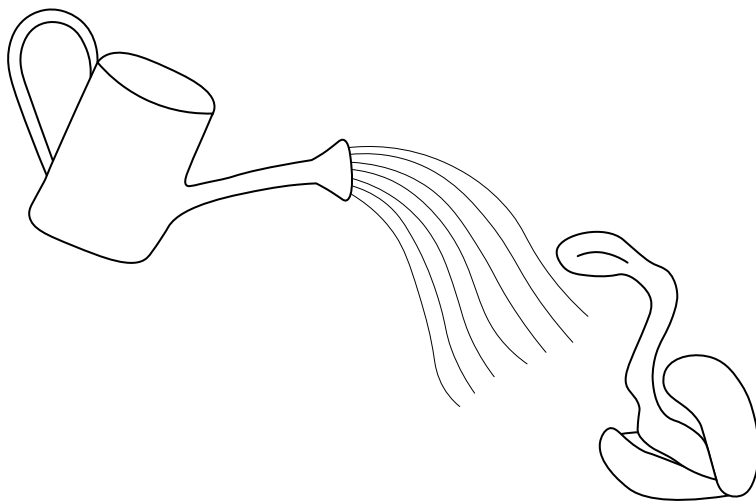

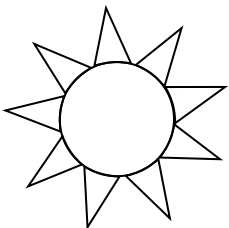

Here is your seed. What kind of plant will it be?

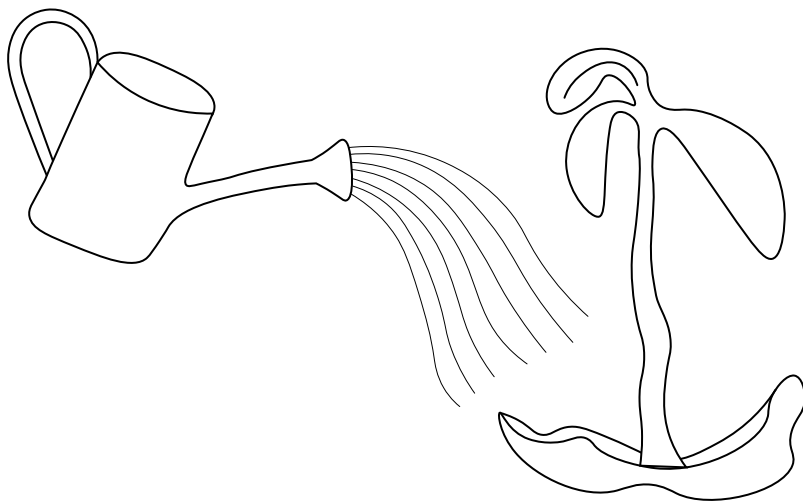

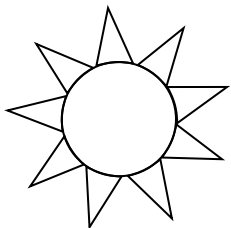

Add some water and soon you will see.

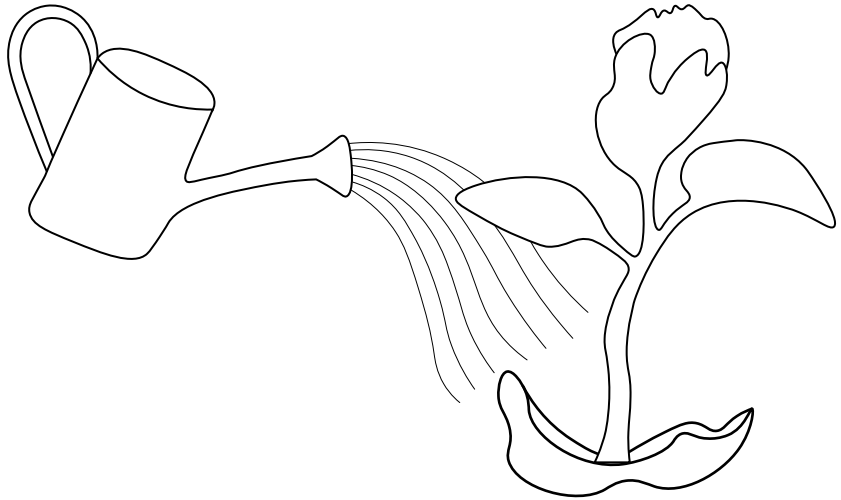

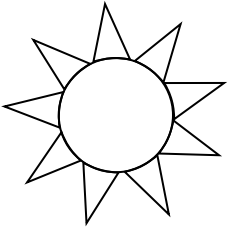

Good job! A sprout has sprung!

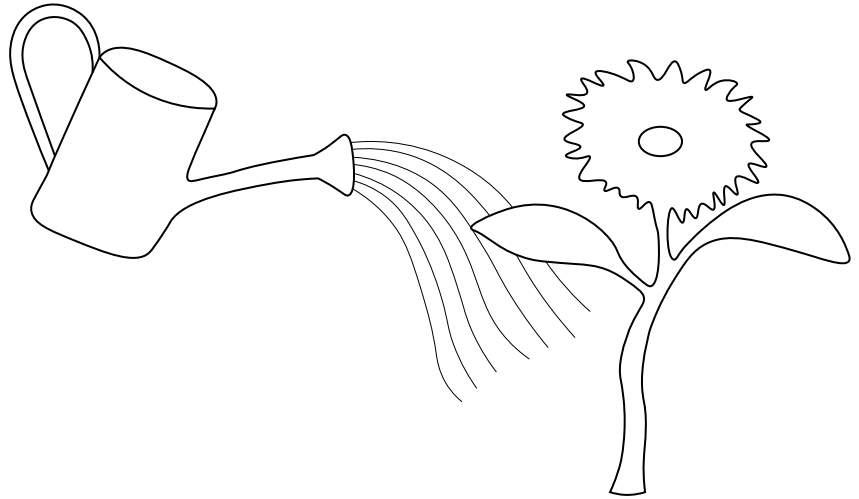

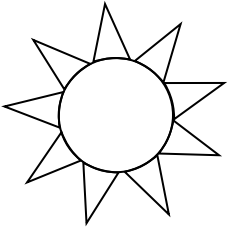

Keep the water flowing and your sprout will keep growing.

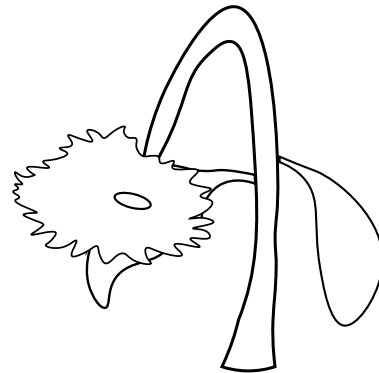

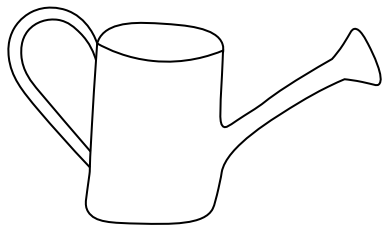

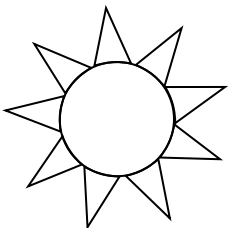

What is this? Green leaves, could it be?

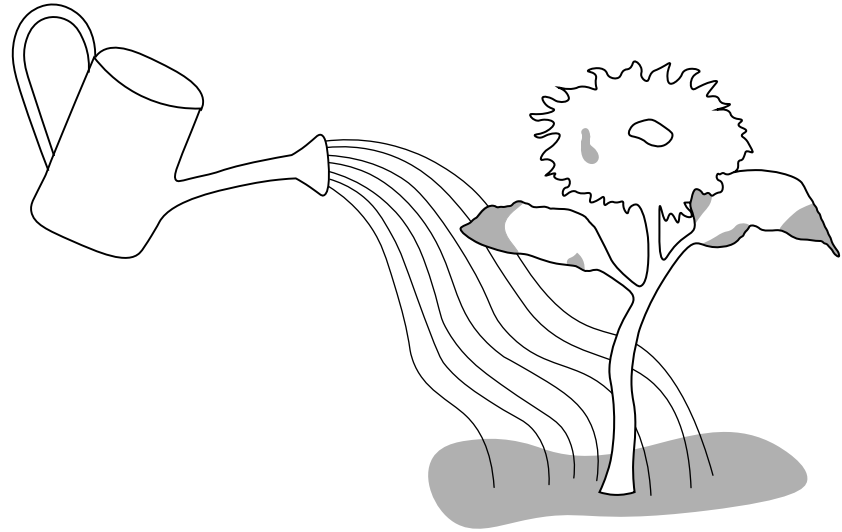

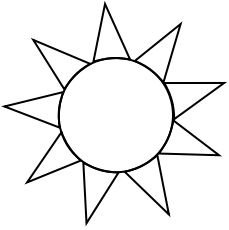

Look here! Your first bud has appeared!

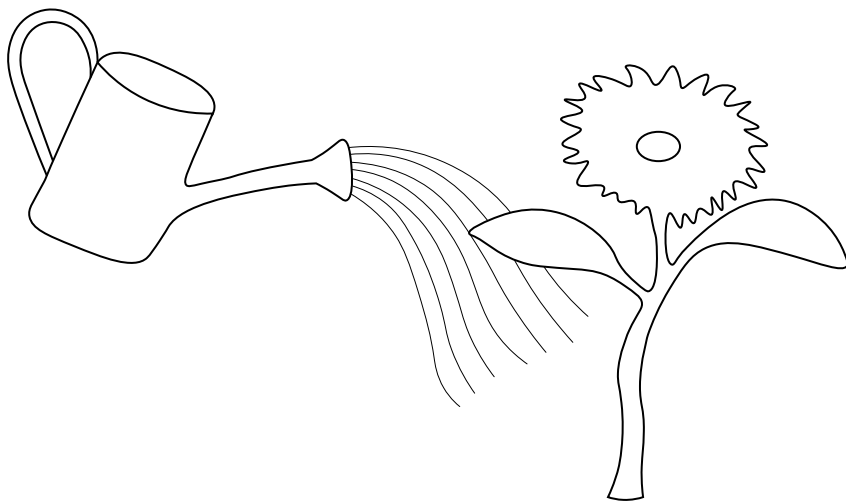

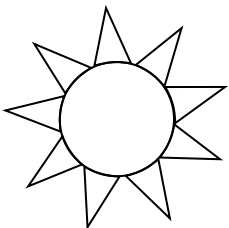

Congratulations, you have a beautiful flower!

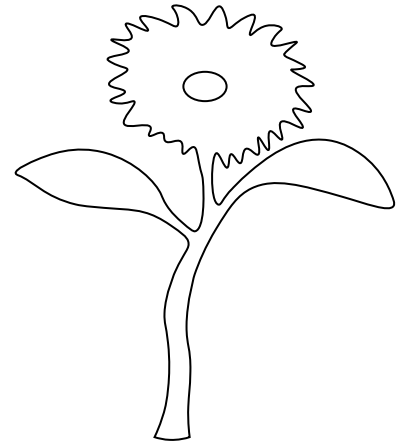

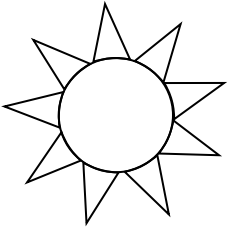

If your flower starts to wilt, it needs more water.

But not TOO much water or it will get sick and lose it's color.

Just like us, plants need the right amount of water.
Not too much and not too little.

Are you ready to be a good plant mother or father?
